

Critical Information Summary

Hubify TB Fibre Ethernet

Service Description

Hubify TB Fibre Ethernet is a high speed, symmetrical internet service that uses fibre optics to deliver speeds of 10Mbps up to 1000Mbps.

This is an unlimited internet service (i.e. there is no restriction on the amount of data you upload/download). Acceptable Use Policy applies to data usage.

Requirements & Availability

Hubify TB Fibre Ethernet is available and limited to certain buildings throughout Australia. Your correct address must be pre-qualified before a formal quotation and/or delivery of service can be provided.

Hubify TB Fibre Ethernet requires a compatible router or firewall at your premise. This router can be sourced externally or (subject to compatibility and availability) purchased outright from Hubify. You can choose our managed router option in which case we will supply and manage the router for you.

A technician will need to attend your premise to install this service and may require access inside the property or areas associated with the property. More than one visit may be required. You will not be charged for these site visits. Additional charges may apply should you change the scheduled appointment. If applicable, charges imposed by a third-party contractor or provider may require further approval.

Inclusions

Hubify TB Fibre Ethernet plans include one static public IP address and the installation of one Network Termination Unit (NTU).

Minimum Service Term

Unless otherwise specified, Hubify TB Fibre Ethernet is available on a 36 month contract term.

Exclusions

Any cabling, switching or additional hardware relating to your use of the service is not included. The technician will not install any cabling between the Main Distribution Frame (MDF) and Internal Distribution Frame (IDF) and will not supply/install any router, firewall, network cabling or other equipment. Supply of power for the NTU is not included.

Relocation of the service and additional setup fees are not included. We cannot guarantee that we will be able to provide this service (or a similar service) at your new location. Early termination charges may apply.

Speed

Actual speeds may vary depending on plan and source/type of content downloaded. "Standard" Hubify TB Fibre Ethernet is delivered using standard CoS (Class of Service) access tails. Performance of standard CoS is 100% EIR (Excess Information Rate) which means, under contention/congestion on the applicable network, this traffic is best efforts. "Premium" Hubify TB Fibre Ethernet is delivered as an un-contended service.

Pricing

Pricing for Hubify TB Fibre Ethernet may vary depending on whether existing infrastructure is in place. In the event of additional commercial works or build costs required for the delivery of Service, Hubify may present an increased Monthly and/or Setup Charge which will require your acceptance.

Optional Equipment and Services

A selection of optional equipment and professional services are available, such as routers, switches, Failover Configuration and Router Management. Prices will depend on the options you select.

Early Termination Charges

If you cancel the service before the end of your contract term, Early Termination Fees (ETF) will apply. ETF is calculated as the monthly charges multiplied by the balance of the contract period.
